VSAT

Voice over Internet Protocol (VoIP)

NewSat delivers high quality VoIP services to remote areas around the world, providing an enterprise-class VoIP phone system.

Voice over Internet Protocol (VoIP)

NewSat's VoIP services provide clients with clear and reliable, business grade calls. NewSat's VoIP over satellite is ideal for remote sites where satellite can reach but traditional fixed-line telephony cannot.

High quality, business grade calls

NewSat's VoIP delivers enterprise-class, low latency calls for remote connectivity in any environment, using the latest VoIP technologies and platforms. Each solution is tailored to every client's specific requirements, guaranteeing high quality, business grade calls.

Call routing for business continuity

NewSat's VoIP have customised call routing options to suit every client's business, ensuring calls are easily re-routed to remote phones, office phones or mobile phones. Automatic time based call routing can be customised for every client, ensuring every call is answered. Voicemail alerts and transcriptions are also available, allowing clients to receive voicemail messages as text on any mobile communications device or email account.

Ideal for remote locations

NewSat's VoIP over satellite provides back to office connectivity from any remote site around the world and is ideal for remote sites, where satellite can reach but traditional fixed-line telephony cannot. NewSat's VoIP can be deployed across a range of industries including oil and gas, mining, defence, government, construction and disaster recovery.

Customised for VSAT requirements

NewSat's VoIP serves the requirements of companies with VSAT networks which carry voice traffic for corporate virtual private networks, wide area networks or rural telephone networks.

Local call rates to all capital cities

Any call made within Australia using NewSat's VoIP service, to any landline within a capital city in Australia, is charged a local call rate. All calls within a client's own VoIP network are free.
