Mining

"We ask for what we need in terms of VoIP and Internet and NewSat respond. They make huge efforts and their customer service is exceptional. NewSat are fast, friendly and responsive people to deal with and they meet my needs absolutely in that regard."

Sharon Paulka, Manager for Radiation, Safety and Environment – Uranium Equities

NewSat has the experience to engineer the most efficient, cost-effective solution, tailored to your specific environment.

NewSat has been providing the mining sector with satellite communications for over a decade. The geographic and operational challenges mine sites present require infrastructure that will provide remote operation, monitoring and management amongst all sites. NewSat provide high-speed voice, video and data for end-to-end communication in and around mine sites. In order to reduce operational costs and provide greater management oversight, NewSat delivers efficient, real-time communication solutions. NewSat ensures mine sites are equipped with the most intelligent, effective and innovative communications, providing streamlined solutions to improve employee productivity and increase efficiency.
