

Global Satellite Solutions

NewSat delivers fast, reliable and ROI driven satellite communication solutions to businesses requiring remote area connectivity.

As Australia's leading independent satellite service provider, NewSat specialises in global satellite communications providing tailored VSAT, teleport and satellite services to 75% of the earth's surface. NewSat provides remote and temporary sites with fast, secure and reliable solutions ensuring unrestricted connectivity anywhere, anytime.

NewSat's experience in the satellite communications industry is extensive and diverse. NewSat works with clients to engineer the most efficient, cost-effective solution, incorporating the latest satellite developments and standards to meet every client's individual needs.

With 24 x 7 x 365 days a year support, NewSat safeguards your business from the implications of down-time, ensuring your link is always on, thereby maximising operational efficiency and productivity.

NewSat's satellite solutions can be deployed across a range of industries and landscapes. From mining to defence, energy to retail, NewSat tailors your satellite communication solution to ensure it is best suited to your business and its requirements.

NewSat will be furthering its satellite capabilities in 2013 with the Jabiru Satellite Program set to launch and operate Jabiru-1, Australia's first independently owned commercial satellite. Jabiru-1, a Ku- and Ka-band next generation satellite, will provide superior coverage over South East Asia, The Middle East and North Africa. Jabiru-2, also scheduled to commence in 2013, will deliver enhanced coverage over Australia, Papua New Guinea and Timor Leste. This fleet of next generation geostationary satellites will lead Australia's space quest.
