SCPC Services

NewSat's custom SCPC networks can support high bandwidths and are ideal for all types of communication services including voice, data and video traffic.

SCPC Services (Single Channel Per Carrier)

NewSat's SCPC networks can deliver high availability and network dependable technology that connects straight into customer's networks through either private terrestrial connections or via the public Internet. This provides clients with advanced reliability, flexibility and superior bandwidth efficiency, irrespective of remoteness.

Solutions for demanding applications

Offering dedicated bandwidth to support both corporate communications and remote site access, NewSat's SCPC-SCPC services provide the perfect solutions for businesses with demanding applications. Applications include corporate financial systems, supply chain systems, maintenance systems

and other software applications, VoIP, video conferencing, and through the use of third-party integration, dedicated network acceleration for latency critical applications.

Connect multiple sites

NewSat's SCPC system allows transmissions to be sent continuously on a single satellite carrier either as a point-to-point network or a point-to-multipoint network, providing hub-less connectivity among sites.

Superior up-time

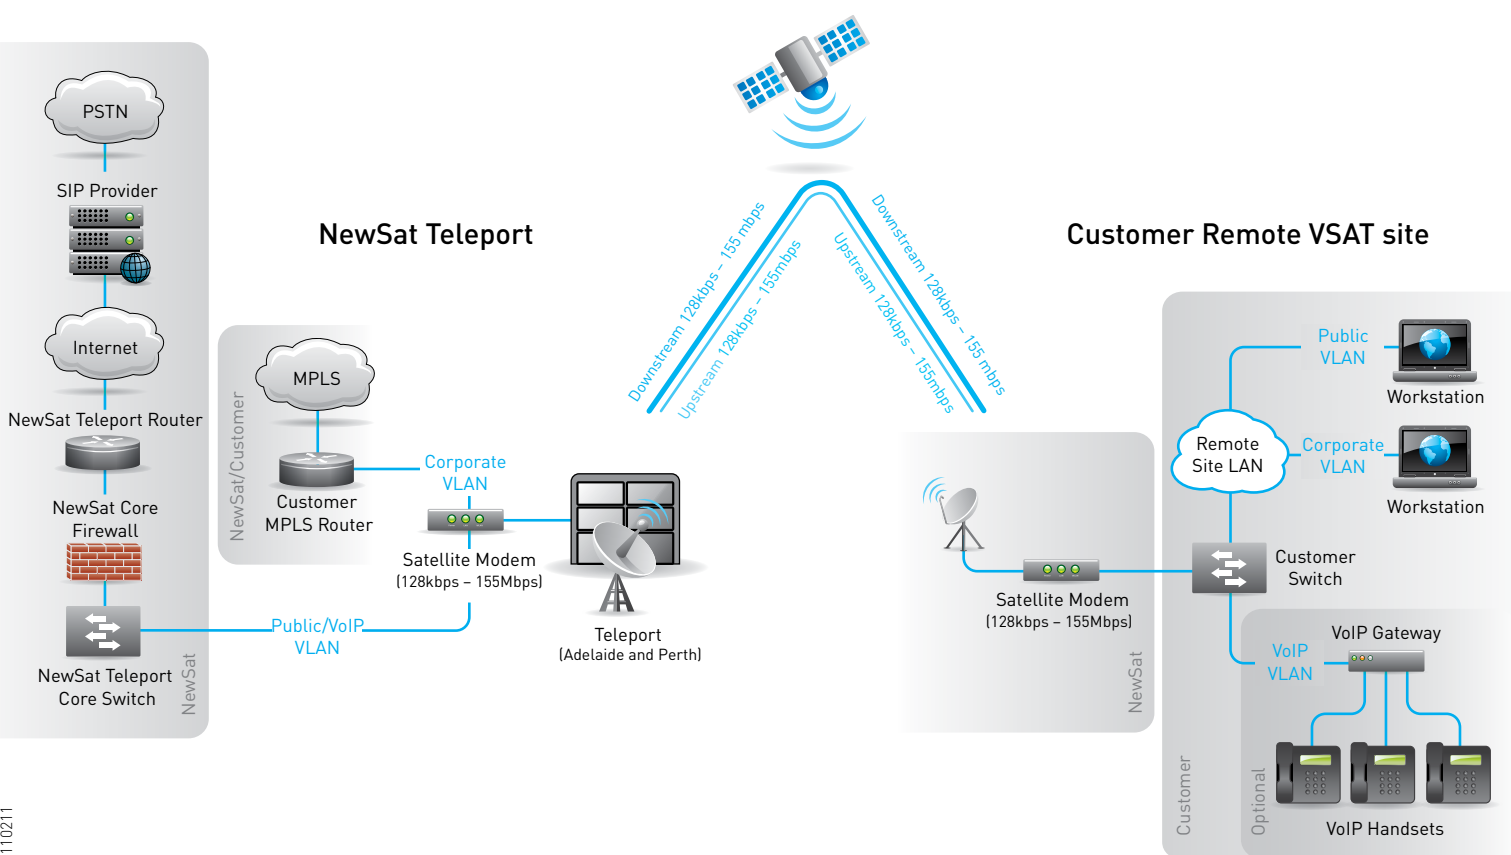

NewSat's Teleport Services offer SCPC solutions with outstanding reliability and performance, using cutting-edge equipment to ensure outstanding satellite coverage, reliability and performance with 99.95% uptime.

Global satellite coverage

With our broad satellite network, NewSat offers global communication for businesses. Our Perth and Adelaide Teleports access satellites that provide near worldwide coverage and ensure clients stays connected.

Flexible innovative communication services

All NewSat Teleport services are flexible and scalable to meet every evolving business requirement. With all the in-house engineering expertise necessary to deliver customer solutions tailored to each individual client's requirements.
